

RAZR² V9

The ultimate stylish feature phone, RAZR² V9 delivers an incredibly rich multimedia experience in an even stronger and sleeker package than the iconic original RAZR™. Ultra-sleek contours add to its distinct appeal, while high-end materials and premium finishes complete the eye-popping package. Innovative capabilities such as CrystalTalk™ and “See What I See,” where users can stream live video to another wireless customer while the call is in progress¹, helps ensure that RAZR² V9 will be at the top of consumers’ “gotta have” lists.

With an integrated music player, stereo Bluetooth wireless technology² and up to 45MB of end user memory³ and up to 2GB of additional memory with an optional microSD card, the RAZR² V9 can store approximately 1,000 songs³ and download them in seconds. Full HTML web browsing and High-Speed Downlink Packet Access (HSDPA) capabilities at up to 3.6 Mbps helps provide streaming media while on the go¹, at broadband-like speeds. Advanced imaging capabilities with a 2.0 megapixel camera including 8x digital zoom, external touch sensitive music keys and intuitive, user-friendly controls, all help provide high-tech function.

RAZR V9

Certain mobile phone features are dependent on the capabilities and settings of your service provider's network. Additionally, certain features may not be activated by your service provider, and/or their network settings may limit the feature's functionality. Always contact your service provider about feature availability and functionality. All features, functionality and other product specifications are based upon the latest available information and are believed to be accurate; however such product specifications are subject to change without notice or obligation.

¹ Network and/or SIM card dependent feature, not available in all areas. Airtime, data charges, and/or additional charges may apply.

² This device supports Bluetooth A2DP-Source, AVCTP, AVDTP, AVRCP-Target, BIP-ImagePush, BPP-SenderDev, DUN-GW, FT-Server, GAP, GAVDP, Headset-AG, HFP (1.5) AG, OPP-Client, OPP-Server profiles. In order for Bluetooth devices to communicate with one another, they must utilize the same Bluetooth profile. To determine the profiles supported by other Motorola devices, visit www.hellomoto.com/bluetooth. For other devices, contact their respective manufacturer.

Certain Bluetooth features including those listed may not be supported by all compatible Bluetooth-enabled devices, and/or the functionality of such features may be limited in certain devices, or by certain wireless carriers. Contact your wireless carrier about feature availability and functionality.

³ Based on 4 minutes per song at a data rate of 128Kbps. Storage capacity is approximate and subject to available memory space and encoding method used; actual capacity varies by content.

⁴ All talk and standby times are quoted in Digital Mode, and are approximate. Battery performance depends on network configuration, signal strength, operating temperature, features selected, and voice, data and other application usage patterns.
