

MOTOROLA

MOTO™ Z8

Kick start your day with the new MOTO Z8. Reinventing the slider phone, the MOTO Z8 brings multimedia, speed, pleasure and mobile broadband¹ to your fingertips. Providing you with the ultimate in entertainment, the MOTO Z8 allows you to watch crystal clear video at 30 frames per second through a large QVGA 16m TFT display. The device also supports optional expandable memory up to 4GB using microSD, which is enough space for full length movies or hours of music. Music can be enjoyed wirelessly utilising Bluetooth™ wireless technology that, when combined with an optional Bluetooth enabled stereo headset such as the Motorola Bluetooth Active Headphones S9, provides complete wireless control and freedom.¹ Feature packed, at 15.3 millimeters, the MOTO Z8 is not much larger than the classic MOTO™ waist band. Providing an innovative and exciting mobile experience the MOTO Z8 allows you to enjoy your multimedia content while on the go with crystal clear video and high fidelity sound. Whether you're watching or streaming video² or having a lengthy conversation, the MOTO Z8 is much more than your typical slider – it's a revolution in mobile multimedia. Goodbye image. Hello reality.

Lightning Fast Speed

For instant gratification when you need the right content, the MOTO Z8 and its HSDPA, Symbian software and 3.5G enablers will come through for you. The MOTO Z8 not only delivers quick access to content, it delivers smooth services and experiences directly to your phone. Staying entertained has never been easier - watch pin sharp videos on the 2.2 inch screen or access on-demand content directly on your handset.² Harnessing the power of mobile broadband, download content over-the-air (OTA) - getting your music, video files, games or even accessing the Internet has never been easier.² From sharing photos to rocking out to your own personal soundtrack, saying you'll be satisfied is an understatement.

Instant Access

From fashion gurus to multimedia junkies, the new MOTO Z8 has something to offer all consumers. Bursting with multimedia capabilities, this do-it-all handset includes a powerful 2.0 megapixel camera with dedicated shutter button for one-click photo and video capture, integrated lumi LED light and even red-eye reduction. With a hot swappable microSD card with up to 4GB of optional memory, you can quickly access files. Equipped with an integrated music player, the MOTO Z8 allows you to create playlists, add creativity to your music with on-screen visualizations and easily skip to the next groove with shuffle capability. The MOTORIZR phone's redesigned user interface allows simple one-click access to all this and more.

Expand Your Horizons

Enabling you to expand your music experience wirelessly, the MOTO lets you set your music collection free ... from wires. The MOTO Z8 effortlessly syncs with your compatible Bluetooth enabled music center wirelessly. Using compatible stereo Bluetooth accessories you can enjoy your favorite tunes wirelessly without ever missing a call – at home, on the move, on the go!¹

Certain mobile phone features may not be activated by your service provider, and/or their network settings may limit the feature's functionality. Contact your service provider for details. All features, functionality and other product specifications are subject to change without notice or obligation.

¹ This device supports Bluetooth A2DP-Source, AVCTP, AVDTP, AVRCP-Target, BIP-ImagePush, BPP-SenderDev, DUN-GW, FT-Server, GAP, GAVDP, Headset-AG, HFP (1.5) AG, OPP-Client, OPP-Server profiles. In order for Bluetooth devices to communicate with one another, they must utilize the same Bluetooth profile. To determine the profiles supported by other Motorola devices, visit www.hellomoto.com/bluetooth. For other devices, contact their respective manufacturer.

Certain Bluetooth features including those listed may not be supported by all compatible Bluetooth-enabled devices, and/or the functionality of such features may be limited in certain devices, or by certain wireless carriers. Contact your wireless carrier about feature availability and functionality.

² Network and/or SIM card dependent feature, not available in all areas. Airtime, data charges, and/or additional charges may apply.

³ All talk and standby times are quoted in Digital Mode, and are approximate. Battery performance depends on network configuration, signal strength, operating temperature, features selected, and voice, data and other application usage patterns. Talk times and standby times will be lower when in Analog Mode.

⁴ Available user memory varies due to the configuration of the phone, which varies by service provider.
